Privileged/Deliberative

Hi –

Just a follow up to my note yesterday. The Draft Report is not in yet, but R8 has seen some preliminary partial data (upon which the Report will be based, along with other info) – attached is EPR's summary of thoughts on that preliminary data. I presume this is close hold.

We are expecting the Draft Report at any time.

Thanks, Kimi

Shaun/Joan/Deb – Staff has looked at the preliminary data shared by DEQ. The attached two pager provides some insight into the issues we may be presented with in the states domestic well report depending on where the state goes with this data.

Hopefully this reflects our conversation from last week- please get me any final revisions asap so it can be ready for Martin and Sandy's use. And thanks a bunch to Kristen and Greg for their work over the Thanksgiving week on this. Once we have finalized it, I will share with Kimi as she has asked to be in the loop for deliberations about Wyoming's report.
